

# Exploring Size

Go on a walk.

Talk about what you can see.  
Challenge children to find things of  
varying sizes.

Explore their toys as you are  
playing. Use size language such as  
big and small. Don't be afraid to  
challenge your children by adding  
more complicated language such as  
enormous or tiny when talking.

Compare shoe sizes.

Collect a pair of shoes from each  
member of the family (it would be  
a nice talking point if they were  
different types too!) and talk about  
their size and compare them.

Set the table together.

Ask you child to pick specific  
cutlery of plates e.g. can you put  
the small plates on the table?

We need the big spoons for  
pudding.
